Download the attached document – **don't open it in Fronter**, it doesn't format it properly. If it still doesn't work, the document is available for download under ressources for today.

Also open the MDN documentation for String:
https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/String

With your group, you should try to answer as many as possible of the problems – each of you, write the answer in your own version of the document, that will be your personal "quick-reference" for string methods.

There is only limited time available, so you won't be able to answer every single problem – after you have worked in groups, we will meet together, and the groups will combine their knowledge!

To make sure that we cover every problem, every group must answer four of the problems, before continuing to the rest.

See your group-number (the breakout-room number) and focus on the four problems listed next to it – you don't have to do them in order.

Group / Room	Focus on these problems
1	2, 6, 11, 13
2	3, 7, 14, 19
3	4, 8, 12, 15
4	5, 9, 13, 16
5	2, 10, 13, 16
6	3, 18, 20, 11
7	4, 17, 16, 8
8	15, 18, 9, 22
9	13, 11, 21, 10
10	5, 6, 7, 9
11	10, 14, 15, 19
12	17, 18, 3, 21
13	2, 6, 11, 14
14	3, 7, 14, 20
15	5, 9, 13, 16
16	2, 10, 13, 16

Remember: **You don't have to write any code other than the method name,** but feel free to do so. The document is going to be part of your own note-collection, and you can refer to it again, when you encounter similar problems in the future.
